INFORMATION DISCLOSURE STATEMENT UNDER 37 CFR 1.97 AND 1.98

Honorable Commissioner of
Patents and Trademarks
Box Patent Applications
Washington, D.C. 20231

Sir:

It is respectfully requested that the citations listed below be considered by the Patent and Trademark Office and be made of official record in the above-identified application.

In the opinion of the undersigned, the below-listed citations represent the closest art known to the undersigned during the preparation of the above-identified application. These citations may be material to the examination of the subject application and are therefore submitted in compliance with a duty of disclosure defined in 37 CFR §§ 1.56 and 1.97.

A concise explanation of the relevance of the pertinent listed patents are set forth below.

CONCISE EXPLANATION OF THE RELEVANCE OF
PERTINENT PATENTS & REFERENCES

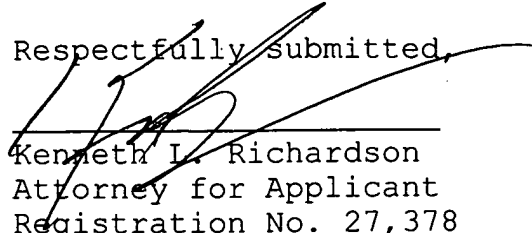

U.S. Patent 4,319,069 is deemed pertinent for its disclosure of chemical treatment of a p-CdTe surface prior to contacting to improve the contact characteristics, by utilizing an oxidizing agent and a leveling agent to form the Te layer.

U.S. Patent 4,456,630 is deemed pertinent in that it discloses a chemical treatment of a p-CdTe surface prior to contacting to improve contact characteristics, by use of an oxidizing acid plus a reducing agent.

U.S. Patent 4,766,084 is deemed pertinent for its disclosure of a process for producing an electric contact on a HgCdTe substrate having a p conductivity and application to the production of a N/P diode, and it specifically uses ion bombardment for removal etching of the SiO₂ insulator layer.

U.S. Patent 4,581,099 is deemed pertinent for its disclosure of a process for replacement of chemical etching with a process involving CF₄ plasma etching plus heat treatment to form an improved gate area in n-type α -Si on top of intrinsic α -Si.

Respectfully submitted,

Kenneth L. Richardson
Attorney for Applicant
